Education

SVKM's Dwarkadas J. Sanghvi College of Engineering *CGPA: 9.17*

Third Year – Bachelor of Technology in Computer Science Engineering (Data Science)

Higher Secondary Certificate (HSC), Maharashtra State Board

82.33% Percentage

Mumbai, India

Aug. 2023 – Present

Mumbai, India

2021–2023

Experience

AI & Software Developer Intern — DigiKendr (Mulund)

Oct 2025 – Jan 2026

- Developed an ad generation system using Gemini API, FastAPI, and Next.js that auto-generated creatives from scraped business data.
- Automated data extraction and ad publishing via Selenium, building an end-to-end pipeline integrated with Meta's ads platform.
- Deployed on AWS EC2 using Docker, S3, and AWS Secrets Manager; configured Nginx, systemctl, DNS via Cloudflare/GoDaddy, and CI/CD with GitHub Actions.

Projects

Sahaay — Disaster Rescue & Relief Platform [Live](#) | [GitHub](#)

Next.js, Python, FastAPI, OpenCV, InsightFace, CLIP, Supabase, PostgreSQL, MapLibre, Recharts, Twilio, Azure

- Built a full-stack disaster management platform on Azure with **25+ REST APIs**, including a FastAPI face recognition service using InsightFace (ArcFace, 512-d) and OpenCV, backed by Supabase PostgreSQL, supporting QR, biometric, and manual registration across **4 role-based user types**.
- Developed a missing-person search pipeline using SQL filtering, weighted scoring, and CLIP embeddings, achieving **90%+ recall** for cross-camp identification at scale.
- Implemented a multi-hazard prediction module using Open-Meteo and USGS APIs, featuring a MapLibre dashboard, ML-based resource allocation, and Twilio SMS alerts in **13 languages**, deployed on Azure.

Geospatial Place Change Detection & Map Update System [GitHub Link](#)

FastAPI, React, OpenStreetMap, Leaflet, Python, GeoJSON, data.gov.sg, OneMap, XAI

- Developed a geospatial change detection system to identify new, closed, and rebranded locations by cross-referencing baseline OSM data with live signals from official datasets, business sites, and delivery platforms.
- Built a location-matching pipeline using OneMap, GeoJSON, and rule-based XAI logic to generate confidence-scored update proposals for predicted map changes.
- Created an OpenStreetMap dashboard with marker clustering, fly-to navigation, and detail panels supporting inspection of **10,000+ POIs** and real-time map update visualization.

Login Anomaly Detection MLOps Security System [GitHub Link](#)

CI/CD, Python, FastAPI, scikit-learn, Jenkins, Docker, AWS EC2

- Built a real-time login anomaly detection system using scikit-learn, deployed via Docker on AWS EC2 with a Jenkins CI/CD pipeline for automated model retraining and continuous deployment.

Who Lies Tonight — Multiplayer 3D Social Deduction Game [GitHub Link](#)

React, Three.js, Socket.io, WebRTC, ElevenLabs Narration, Spline

- Built a real-time multiplayer Mafia game in a 3D environment using React, Three.js, and Socket.io, featuring WebRTC voice chat and Ready Player Me avatar customization.

Technical Skills

Software Development: Java, Python, JavaScript, React.js, Next.js, REST APIs, Tailwind

Backend & Systems: FastAPI, Node.js, WebSockets

Data Engineering: SQL, ETL Pipelines, PySpark, Snowflake

Cloud & DevOps: Amazon Web Services (EC2, S3, Secrets Manager), Docker, Jenkins, CI/CD (GitHub Actions), Nginx, Linux

Databases: MySQL, PostgreSQL (Supabase), MongoDB, IBM Db2

Tools & Platforms: Git, Selenium, Netlify, Vercel, Render

Certifications & Achievements

- **1st Runner-Up — Here Geospatial Student Hackathon:** Detected and updated stale OSM map data using GIS and geospatial analysis; recognized among top teams.
- **IBM Data Engineering Professional Certificate — Coursera:** ([Link](#))
- **AWS Academy Cloud Foundations & Cloud Architecting — AWS:** Completed hands-on training in cloud infrastructure design using EC2, S3, and IAM, covering deployment, access control, and high-availability architectures. ([Link](#))
